

MICHAŁ NOGA

Front-end Developer & Designer

I'm a Front-end Developer and Designer with over 6 years of commercial experience in creating websites, online stores, and web applications. I have also spent a significant amount of time working as a UX/UI designer, specializing in Adobe XD, Figma, and Photoshop. Recently, I've worked on individual WordPress projects, including a photography studio website and an e-commerce store for a company offering training in EU funding programs.

Jest, Cypress, React Testing Library, Unit Testing, visual regression testing, accessibility testing, Lighthouse

Design:

Figma, Adobe XD, Photoshop

Other:

Firebase, CI/CD, Git, Storybook, SEO, Wordpress, PHP (Basics)

EXPERIENCE

• Future Processing 2022 - 2024

Software Developer / Designer

During my two years at Future Processing, I was involved in four projects, the longest of which was a custom design system I created for Cambridge University Press & Assessment using Vue.js. In this project, I closely collaborated with a team of designers, supporting them with my experience and expertise. I also integrated different parts of the ecosystem written in various versions of Vue.js (2/2.7/3). Another interesting project was in React.js within the security industry, where maintaining high code quality standards and comprehensive test coverage was crucial for the application supporting hundreds of companies and large organizations.

As a Front-end Developer and Designer, I also had the opportunity to share my knowledge by mentoring several junior and less experienced mid-level developers as part of the TRAIN UP training program.

• WeMakelt 2020 - 2021

Front-end Developer / Designer

During my collaboration with WeMakelt, I created and designed websites, logos, and business cards for small and medium-sized businesses. I also worked on several projects in the Crypto and DeFi sectors. Additionally, I designed an advanced website for a marketing agency and its branches.

• Dianet 2019- 2020

Front-end Developer / Lead Designer

At Dianet, I built websites and online stores using WordPress, WooCommerce, PrestaShop, HTML, CSS, SASS, Bootstrap, jQuery, JavaScript, Ajax, PHP, Laravel, and Gulp. Alongside a colleague, I created a custom mini CMS and implemented it in a digital agency project. I also designed content in Photoshop and Adobe XD and led junior graphic designers as Lead Designer.
