

MICHAŁ NOGA

Front-end Developer & Designer

I'm a front-end developer with over six years of commercial experience in creating websites, online stores, and applications. I've also spent a significant amount of time as a specialist UX/UI designer using Adobe XD, Figma, and Photoshop.

EXPERIENCE

• Freelancing

2024 - Currently

Front-end Developer / Designer

Currently, through my agency StronyGodnePolecenia and in collaboration with other software houses, I design and develop websites and online stores using WordPress, Astro, React.js, and other technologies depending on the project requirements. I also place a strong emphasis on web accessibility.

• Future Processing

2022 - 2024

Software Developer / Designer

During my two years at Future Processing, I was involved in four projects, the most significant of which was a dedicated design system developed for Cambridge University Press & Assessment using Vue.js. In this project, I worked closely with the design team, supporting them with my expertise and knowledge. I also integrated various parts of the ecosystem built in different versions of Vue.js (2/2.7/3).

Another notable project was in the security sector, developed with React.js, where I contributed to maintaining high code quality standards and ensuring extensive test coverage in an application serving hundreds of companies and major institutions.

• WeMakelt

2020 - 2021

Front-end Developer / Designer

During my collaboration with WeMakelt, I designed and developed websites and logos. I also contributed to numerous projects in the Crypto and DeFi sectors. Additionally, I created a comprehensive platform for a marketing agency and its subsidiaries.

• Dianet

2019- 2020

Front-end Developer / Lead Designer

At Dianet, I developed numerous websites and online stores based on WordPress, WooCommerce, Prestashop, HTML, CSS, SASS, Bootstrap, jQuery, JavaScript, Ajax, PHP, Laravel, and Gulp. During this time, I also produced a wide range of visual content using Photoshop and Adobe XD.
